SKILLS AND TECHNOLOGIES

- **Languages:** HTML, CSS, JavaScript, SQL, PHP, Python
- **Technologies:** Bootstrap, Tailwind, React.js, Livewire, Alpine.js, Figma, Laravel, GitHub, MySQL, WordPress, Flask, Express.js, PostgreSQL, Node.js, Express.js

EXPERIENCE

Freelance

Software Engineer

Feb 2025 – Present

- Crafting custom software solutions to automate client processes, boosting efficiency and productivity.
- Designing scalable software architectures capable of handling high user loads, ensuring robust performance and reliability.
- Implementing robust testing and quality assurance to deliver reliable and bug-free applications.

QVantage

Junior Software Engineer

Oct 2024 – Feb 2025

- Maintained and enhanced a web application to ensure optimal performance and to improve user experience.
- Developed and integrated new features into legacy code, improving functionality and expanding the application's capabilities.
- Documented processes and updates to promote clear communication and knowledge sharing within the team.

PocketDevs Software Solutions

Application Developer

Aug 2023 – June 2024

- Created custom web solutions using HTML, PHP, CSS, JavaScript, and Laravel, helping small to medium-sized businesses improve their digital presence and streamline operations.
- Implemented software development best practices to build scalable, reliable, and efficient applications that meet client needs.
- Collaborated in diagnosing and resolving web-based system issues, ensuring high performance and improving user experience.

BASE404 Web Development Bootcamp

Operations Associate

Oct 2023 – Oct 2024

- Supported students with programming guidance, enhancing their learning experience and contributing to their academic success through hands-on assistance.
- Instructed students on modern technologies and best practices for full-stack development, promoting a dynamic and up-to-date learning environment.
- Led masterclasses on emerging technologies, keeping students informed about the latest industry trends and advancements to prepare them for real-world development challenges.

PocketDevs Software Solutions

Web Developer Intern

Apr 2022 – Oct 2022

- Assisted in developing custom web solutions using HTML, PHP, CSS, JavaScript, and Laravel, enhancing the digital presence of small to medium-sized businesses.
- Followed industry best practices in web development to help build efficient and scalable applications under senior developer guidance.
- Collaborated in troubleshooting and debugging web-based systems, improving system performance, and supporting user satisfaction.

PROJECTS

Company Website

PocketDevs Software Solutions

- Engineered a robust Content Management System (CMS) to streamline the organization and management of website content, playing a crucial role in maintaining the website's structure, content, and aesthetics.
- Utilized TailwindCSS, Alpine.js, and Livewire to build a dynamic and user-focused frontend, delivering an interactive and engaging user interface.
- Employed Laravel, a renowned PHP framework, for backend development, and used a MySQL database for efficient and secure data management.
- Incorporated full CRUD functionality, facilitating users to perform various tasks with ease and efficiency.

Admission System

Technological University of The Philippines Visayas

- Engineered a comprehensive School Admission System to streamline and digitize the previously manual admission process.
- Integrated Data Analytics module into the system, providing a line graph visualization of the school's annual enrollment data, and enhancing data-driven decision-making.
- Leveraged Laravel as the primary technology stack, enhancing the system's performance and scalability.

School Website

Technological University of The Philippines Visayas

- Directed a team of student developers, designers, and content creators, fostering collaboration and innovation.
- Partnered with UI designers to create a website that met the school's requirements, ensuring a seamless user experience
- Utilized the TALL stack (TailwindCSS, Alpine.js, Livewire, and Laravel) for website construction, resulting in a robust, dynamic, and user-friendly site.

CERTIFICATIONS

Project Management (TestDome), **REST API** (TestDome), **Javascript** (TestDome), **Laravel and PHP** (TestDome), **SQL** (TestDome), **HTML/CSS** (TestDome), **Responsive Web Design** (TestDome).

EDUCATION

Bachelor of Computer Engineering Technology

Technological University of the Philippines Visayas

June 2020 – July 2024s

Relevant Coursework: Data Structures & Algorithms; Software Engineering; Frontend Development; Backen Development; Advanced database; System Analysis & Design
